

UNITED EMPLOYEES BENEFIT TRUST

COST ESTIMATOR TOOL

The Trust is committed to providing a cost estimator tool that Trust Members can use to determine what benefits the Trust will provide for certain services based on the terms of their specific benefit plan and where the individual stands as of the request date in meeting annual deductible and out-of-pocket maximum requirements. For 2023 the cost estimator tool is limited to 500 designated services.

If you want to get a cost estimate, please contact the Trust Office at (253) 474-1214. Be prepared to provide either the billing code or a description of the service involved and where you are seeking to have it performed. The Trust will review whether the service is among those on the list for 2023 and if so, will provide a good faith estimate of what the Trust will pay and your share of the costs.

Please be aware that the Trust is working with a third-party vendor to provide a separate online cost estimator tool that should be available in the near future.

If you have questions, please contact the Trust at (253) 474-1214.
